

Covid-19 Update

To: Customers and Sales Representatives
From: Len Ruby

Some good news: Krug has been defined as an essential business, and therefore will not be shutting down. We are continuing operations without interruption, while working to safeguard our staff through a range of protective measures.

We have experienced no delays of any shipments at the border, as the free flow of goods and trade continues at the US/Canadian border.

We are experiencing a surge in orders and inquiries for some healthcare product categories, and are working to increase capacity in these areas, and to expand *KrugExpress* with the previously noted Quickship program for certain healthcare products.

Krug... Advancing Design Through Innovation
