

#### FIXED T-ARM

A comfortable and supportive urethane pad, 10" in length by 3.5" wide, which can be field replaced if damaged, as can the entire arm. The arms can be adjusted inward and outward by 1.25" per arm, or 2.5" per chair.

#### ADJUSTABLE T-ARM

In addition to the same features as the Fixed version, the arm pad has a 3-position rotation horizontally: center, left and right. The arm pad also adjusts forward and rearward in 5 positions, and is height-adjustable in 9 positions ranging over 4.

#### CANTILEVER ARM

The top surface of this arm has been proportioned to provide comfortable arm support, with a resting surface of 10" x 2". The arms can be adjusted inward and outward by 1" on each arm, or 2" per chair.

#### AQUA SEAT AND ARMLESS OPTION

The seat has been carefully researched and shaped to provide extended sitting comfort, with a foam density that provides an optimal combination of softness and firmness. All of the arm styles can be added in the field to the Armless version.

#### MESH BACK

Made of breathable polyester elastomers, the Mesh Back has an ideal tension that provides comfortable lumbar and thoracic support for extended use and healthy sitting - enhanced further with the air circulation provided by the mesh's unique design, and an easy-to-clean surface. The back is also replaceable.

#### FULLY UPHOLSTERED BACK

A unique construction with a mesh suspension core, combined with extensively-researched ergonomic curvature, gives the Aqua back a form-fitting comfort and a thin profile that is designed for healthy long-term sitting.

#### SYNCRO TILT MECHANISM

There are 5 recline/lock positions, in addition to a full range of free-flowing movement. The forward position of the pivot point allows the back and seat to adjust in a 2:1 ratio synchronously, providing comfortable recline of the back with minimal incline of the seat.

#### SWIVEL TILT MECHANISM

Provides excellent value, durability and simplicity: forward and backward tilt, tilt lock, and 360 degree swivel, as well as vertical adjustment - ideal for short-term use environments, such as meeting rooms, where numerous adjustability features may not be desirable or necessary.

#### SEAT SLIDER OPTION FOR SYNCRO

Available on the Syncro-Tilt Mechanism, this offers a 2" range of forward and rearward adjustment of the seat, with a locking feature.

Extensively researched and painstakingly designed, Aqua features unique proportions and contouring that make it light and small-scaled in its exterior footprint, but spacious and exceptionally comfortable on the inside. This (and its sleek style) gives Aqua a multi-purpose appeal, enabling it to suit many functions and environments: conference rooms, training areas, private offices, open plan workstations, as well as hotel and hospitality settings. Both the mesh and upholstered backs have been formed with ergonomic curvature to provide form-fitting lumbar and thoracic support for comfort and healthy sitting. Their thin, elegant profile combines beautifully with Aqua's soft-yet-firm, carefully contoured seat, and arms that have been contoured and angled for optimal positioning.
