Krug offers an extensive range of furnishings for private office and conferencing, and a comprehensive seating collection. A company-wide program is in place to reduce the impact of our products and process on the environment. For a copy of this program, or more information about products, please contact your local Krug representative, or Krug Customer Service.

BAL2A2C

Bali combines the warmth and beauty of wood with the strength and durability of steel to provide a stylish and functional seating solution for offices, meeting and training rooms, libraries - as well as cafeteria, dining and waiting areas. The molded Beech plywood seat and back shell provides a surprising level of lumbar support - Bali remains supportive and comfortable even during extended periods of sitting. This is enhanced by the subtle flexing of the plywood back.

The seat and back shell can be upholstered in its entirety on the inside, on the seat only, or is available as an all-wood shell. Wood components are available in a wide range of standard finishes, as well as custom stains.

Bali's is superbly functional in its stackability: it is designed to stack 6 chairs high, and is available with a stacking dolly for storage. A ganging option makes Bali a great solution for waiting areas and larger seating settings -including auditoriums and churches.
