

FULLY UPHOLSTERED ARM

Combination upholstery (more than one upholstery cover within the same unit) is an option on all Jordan upholstered products. Pricing for this option is the grade price for the highest grade upholstery selected. If the upholstery covers are the same grade, or are COM, a 10% upcharge is applied to the graded price.

CLEAN OUT

Jordan lounge seating models have a built-in clean out feature: a space at the back of the seat that allows dirt and debris to be forced through and fall to the floor for easy clean up and maintenance - designed so that it does not detract from the comfort or appearance of the product.

WOOD ARM

The arms of Jordan seating have been carefully designed for ingress and egress, with a rounded, easy-to-grip size and shape, and a forward height incline that supports the sitter's movement and body weight as they move into and out of the chair.

FREESTANDING TABLES

A selection of occasional tables are designed to complement Jordan multiple seating, as well as Jordan guest and lounge seating.

JOR3-1UPH

JOR3-2WOD

Designed in collaboration with several leading healthcare architects, designers, and professionals, Jordan is a collection that transcends conventional healthcare seating. A comprehensive research and design process has yielded a heightened level of aesthetic beauty, combined with exceptional ergonomic support and sitting comfort.

FEATURES:

- Solid Beech or Maple Hardwood
- Coil Spring Suspension System
- Clean Out
- Antimicrobial Finish
- Contrasting Seat & Back
- Moisture Barrier
- Life Time Warranty

JOR3-1UPH

Jordan – defined as a “healing river” in ancient times – utilizes research-based curvature in both the seat and back to encourage correct yet comfortable sitting posture. “Waterfall” seat fronts and a canted seat angle are designed to help prevent discomfort for the user’s hips and legs, promote good circulation while in a seated position, and assist ingress and egress. A unique coil spring suspension system provides exceptional comfort for the user, while also extending the life of seat foam – and important feature in high-traffic settings.

All Jordan products are Greenguard certified, and have been designed to achieve reduced environmental impact: steel and foam components utilize recycled, and recyclable, materials, and wood materials are sourced from certified, managed forests that utilize sustainable forest management practices. Krug maintains a comprehensive program of environmental practices that is measurably reducing the environmental footprint of the company and its products.

The arms of Jordan seating have been carefully designed for ingress and egress, with a rounded, easy-to-grip size and shape, and a forward height incline that supports the sitter’s movement and body weight as they move into and out of the chair.

Jordan features a proprietary anti-microbial finish, which actively resists the growth of germs, microbes and bacteria. These anti-microbial properties, combined with the exceptional strength, marring and chemical resistance of Krug’s Enduraguard finish system, provide a wood surface coating that is uniquely suited to the demands of a healthcare environment.
