

JORDAN RECLINER

FLIP UP TABLET
The tablet's size is 18" x 14" 3/4", and it can be located on either side of the recliner. It is available in Beech and Maple veneer, as well as plastic laminate with a PVC edge. It folds flat (protruding 3" from the side of the recliner when flat).

PUSH BAR
This is a standard feature on the Jordan recliner, ergonomically designed to assist caregiving staff in the movement and operation of the recliner, and reduce back strain on the caregiver.

IV POLE
The Jordan IV pole is height adjustable, and can be added in the field. It can be located in any of four locations (left or right, front or back) - if ordered with the recliner, the location must be specified at time of order.

3-POSITION WITH TRENDELENBERG
This mechanism provides the standard 3 positions as well as the additional Trendelenberg position: full recline with the footrest fully extended, seat-back angle remains 125 degrees, but the back is now 65 degrees from vertical - resulting in the feet being above the head.

CASTERS
Standard on Jordan recliner are (4) 4" diameter soft wheel swivel locking casters. The caster is locked both directionally and rotationally, keeping the recliner secure when locked.

WOOD ARM WITH URETHANE CAP
The optional arm cap provides enhanced durability and protection for the arms. It is field replaceable if it becomes damaged or degraded.

Krug Healthcare Solutions is dedicated to the design and manufacture of innovative, highly functional, durable and exceptionally attractive furnishings for healthcare and other intensive-use environments. We are focused on evidence-based design, through research and collaboration with healthcare interior designers, facility managers and caregiving professionals. We take intense pride in the quality of every piece we make, building on a legacy of customer satisfaction that began in 1880. We have committed the company to achieving environmental sustainability, with the extensive use of recycled and recyclable materials, certified woods, a recycling program throughout the company, and GREENGUARD™ certification of our products. A complete summary of our environmental program can be obtained from your local Krug representative.

FEATURES:

- Two Mechanism Options
- Structural Steel Seat Frame
- Field-Replaceable Upholstery
- Field-Replaceable Components
- Antimicrobial Finish
- Wood Arm With Urethane Cap
- Life Time Warranty
- GREENGUARD™ Certified

We've paid extraordinary attention to patient comfort: generous multi-density foam contoured to reduce muscle strain and fatigue during long periods of sitting or reclining.

Jordan features a proprietary anti-microbial finish, which actively resists the growth of germs, microbes and bacteria. These anti-microbial properties, combined with the exceptional strength, marring and chemical resistance of Krug's Enduraguard finish system, provide a wood surface coating that is uniquely suited to the demands of a healthcare environment.

JOR6-RCW01

Designed in collaboration with several leading healthcare architects, designers, and professionals, Jordan is a collection that transcends conventional healthcare seating. A comprehensive research and design process has yielded a heightened level of aesthetic beauty, combined with exceptional ergonomic support and sitting comfort.

JOR6-RCW01

We asked caregiving professionals and leading healthcare designers how we could build a better recliner, and the result is a product that has some unique solutions to very real and practical needs. We learned how hard it is for nurses to move these big, heavy chairs - so we made it lighter, and designed an ergonomic push bar as a standard feature to ease back strain. We learned that some recliners ordered without casters can cause problems, so we made soft-wheel, swivel, easy-to-lock casters a standard feature. And we designed the Jordan Recliner so that virtually every component can be field-replaced, because these chairs go through so much use and abuse. Where other manufacturers talk about the long life of their products, we have taken this to a new level by truly allowing you to extend the chair's life, and make it "good as new" when it is damaged, or just worn out.

JOR6-RCW01

JOR6-RCW02

Replaceable seats and backs, as well as replaceable seat and back covers, and a full range of other replacement components – all designed to be quickly field-installed – allow damaged and degraded components and materials to be easily restored at low cost.

Jordan has been constructed to withstand the rigors of healthcare environments, and has been extensively tested to levels that well exceed established industry standards. Krug stands behind this collection with a Lifetime Warranty.
